PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of experience building and scaling production SaaS applications using React.js, Next.js, Node.js, and Express.js. Skilled in cloud-native, high-availability AWS architecture (EC2 Auto Scaling, ALB, RDS, S3, CloudFront, ElastiCache/Redis, Route 53), RESTful API design, JWT/RBAC/PBAC authentication.

TECHNICAL SKILLS

- Languages:** JavaScript, TypeScript, HTML5, CSS3, SQL
- Frontend:** React.js, Next.js, Tailwind CSS, Socket.IO, Responsive Web Design
- Backend:** Node.js, Express.js, RESTful APIs, JWT, RBAC, PBAC, Prisma, Sequelize ORM
- Database:** MySQL, Database Design & Optimization
- Cloud & DevOps (AWS):** EC2, Auto Scaling Group (ASG), Application Load Balancer (ALB), RDS, S3, CloudFront (CDN), ElastiCache (Redis), Route 53 (DNS), Nginx, Horizontal Scaling, System Design
- Tools:** Git, GitHub, Postman, k6 (Load & Performance Testing)

WORK EXPERIENCE

Spack Digi Solutions, Hyderabad

Full-Stack Developer

May 2024 - Present

Oct 2025 - Present

- Scalable SaaS Systems:** Designed and implemented core features for a production **SaaS platform**, contributing across both **RESTful API** backend services and **React.js/Next.js** frontend, improving performance and maintainability.
- Horizontal Scalability & High Availability:** Deployed **AWS EC2** instances behind an **Auto Scaling Group (ASG)** and **Application Load Balancer (ALB)** with **Nginx** reverse proxy, achieving reliable, zero-downtime handling of production traffic spikes.
- Performance & Load Testing:** Boosted throughput by caching public API responses at the **CloudFront** edge, serving requests directly from cache and bypassing origin load, validated via **k6** load testing sustaining up to **11.5 million requests** at a **99%+ success rate**.
- Caching & API Optimization:** Implemented **Redis caching** via **AWS ElastiCache**, reducing database load and lowering API response latency.
- Global Asset Delivery:** Hosted static assets on **AWS S3** for reliable, scalable storage and faster page load performance.
- Security & API Architecture:** Designed scalable **RESTful APIs** secured with **JWT**-based authentication, **RBAC**, and **PBAC** authorization models, improving maintainability and controlled access.
- Agile Delivery:** Collaborated with a cross-functional team of 2-3 developers using **Agile** practices for end-to-end feature delivery, enabling faster, efficient releases.

Tech Stack: Node.js, Express.js, TypeScript, JavaScript, MySQL, Sequelize ORM, AWS (EC2, S3, RDS, CloudFront, ElastiCache, Redis, Route 53, ASG, ALB), Nginx, k6, REST API, JWT, RBAC, PBAC, Cloud Architecture

Spack Digi Solutions, Hyderabad

Frontend Developer

May 2024 - Sept 2025

- UI/UX Modernization:** Redesigned interfaces across **15+ applications** using **React.js** and **Tailwind CSS**, improving usability and design consistency.
- Real-Time Features & API Integration:** Implemented permission-based access control and real-time functionality using **Socket.IO**, and delivered seamless frontend-backend API integration for efficient data flow.

React.js, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS

EDUCATION

Malla Reddy Engineering College, Hyderabad

B.Tech, Electronics and Communication Engineering | CGPA: 8.0/10

Aug 2021 - Jun 2024

PROJECT WORK

Hospital Appointment Management System | [GitHub](#)

Tech Stack: Node.js, Express.js, MySQL, Prisma, JWT, AWS EC2, Nginx, React.js, Tailwind CSS, ShadCN

- Built a full-stack hospital appointment platform with automated doctor scheduling, patient authentication, and seamless booking workflows.
- Designed a scalable **JWT**-based security architecture with **PBAC** to protect and manage role-specific dashboard operations.
- Deployed backend on **AWS EC2** using **Nginx** as a reverse proxy for secure, efficient production hosting.

ACHIEVEMENTS

- Delivered 3+ freelance projects with 100% on-time completion, resulting in strong client referrals and repeat business.
